# Asbestos Awareness

This training is for those who carry out work on buildings that were constructed before the year 1999 to ensure that they are aware of the dangers of asbestos, can recognise what it looks like and know what to do if they come across it in their day to day work.

Candidates will learn:

- Nature and properties of asbestos
- Types, uses and likely occurrences of asbestos
- Avoiding the risks from asbestos
- What to do if suspicious materials are found
- Workplace precautions
- Undertaking work activities in a safe manner
- Asbestos regulations
- Procedures following an asbestos exposure

Certificates options:

- In house BTP certificates (no extra charges)
- UKATA certificates (extra £10 per person)

Duration: ½ day.

# Non-licensed asbestos removal

This training is for those who carry out work on buildings where non licensed asbestos is present. The course will ensure that they are made aware of the dangers of non-licensed asbestos, can recognise what it looks like and know how to remove it safely.

Candidates will learn:

- Asbestos Awareness
- Types of non-licensed work (notifiable and non-notifiable)
- Control measures required
- PPE requirements
- How to undertake specific tasks including drilling holes, removing panels, removing cement-based products, removal of floor tiles, gaskets etc.
- Preventing the spread of asbestos and controlling exposure
- How to deal with the waste generated
- How to adequately decontaminate after work

Duration: 1 day
