This 2 day medium risk confined space training course is designed for anyone who works in a medium risk environment and includes preparing to work safely, entering, and exiting medium risk confined spaces safely, using equipment and tools safely, following procedures, dealing with emergencies and medium risk control entry awareness.

This course is taught in simulated confined space environments – such as an indoor tunnel – and covers; safe entry, emergency procedures and escape using breathing apparatus.

Duration: 2 days.

This course covers things like:

- preparing to enter and work safely in confined spaces
- entering and exiting confined spaces
- preparing and using respiratory protective equipment (RPE) for working and escape purposes
- using equipment and tools safely
- dealing with emergencies
- controlling entry and arrangements for confined spaces
- Planning, managing and reviewing work for confined spaces

The qualifications are delivered through a combination of practical and theoretical training. You will look at areas such as: risk assessments, classifications of confined spaces, equipment and procedures.
